

2605 WHITE ELECTRONIC SOUNDER (SQUARE)**APPLICATIONS**

The 2605 Square Electronic Sounder is coloured white and is suitable for use in hotel bedrooms or other areas when unobtrusive installation is important. The unit is supplied ready for fitting to a single deep installation box, or a matching surface mounting box can be supplied as an optional extra.

**FEATURES**

- Complies with BS5839
- Full System Compatibility
- Electronics Encapsulated
- Ultra-Slim Profile
- Low Current Consumption
- High Sound Output & Continuously Rated
- Adjustable Volume
- Flush or Surface Mounting

OPERATION

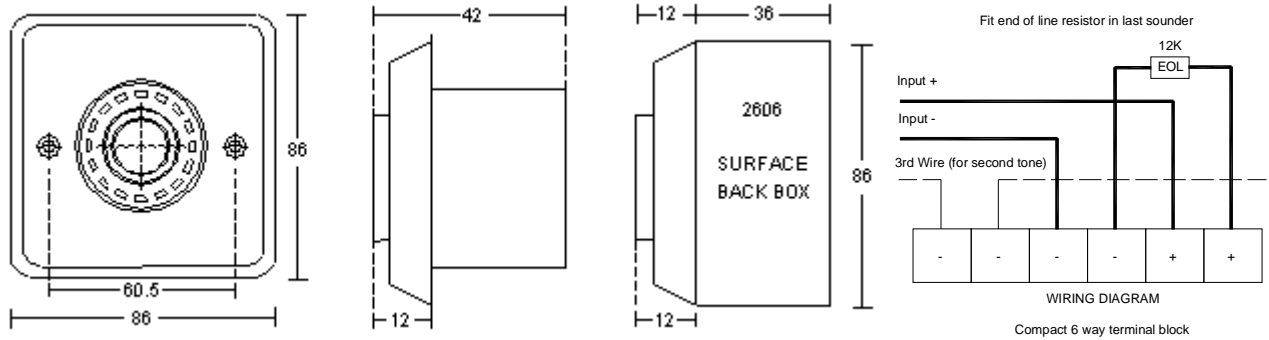

A 2605 Electronic Sounder (Square) has a high sound output, low current consumption and is continuously rated. The sounder meets the recommendations of BS5839 Part 1 2002.

A second tone is available if a third wire is installed in the sounder circuit, depending upon the type of control equipment used.

Surface cabling can be accommodated through the matching surface back box or when flush fitting a deep single gang box with a minimum depth of 36mm is required to allow for wiring termination clearance.

This sounder is also supplied in red (2603). See ordering detail on the rear of this sheet.

APPROVALS : Tested and approved to BS5839 Part 1 by the Loss Prevention Council

SPECIFICATION

Order Code	2605
Operating Voltage Range	10 – 28V DC
Current Consumption	18mA at 24V DC
Starting Current	30mA for 2 milliseconds
Starting Time	1.5 milliseconds
Frequency	800 / 1000 Hz
Operating Temperature	-40°C to +80°C
Sound Output	24v DV 101 dB at 1M
Line Monitoring Method	Polarised Input
Material	ABS Plastic Case
Colour	White (Red Ref 2603)
Weight	0.3 Kg
Dimensions	86 H x 86 W x 42 D
Ingress Protection	IP65
