

**5051 METAL BODY INTERIOR LUMINAIRE SEMI-RECESSED (SLAVE/MAINS)****APPLICATIONS**

The 5051 Metal Body Interior Luminaire Semi-Recessed (Slave/Mains) is a sturdy general purpose luminaire and is suitable for many internal emergency lighting applications. It is ideal for final exits and emergency escape routes in hotels, restaurants, hospitals, schools and commercial premises.

**FEATURES**

- Opal Formed Diffuser
- Attractive Fitting
- Easy installation
- Reliable
- Non-Recessed and Fully Recessed versions are available
- Legends Kit available
- Choice of Body Finishes
- 3 Hour Emergency Luminaire
- Designed to Comply with ICEL and British Standards

**OPERATION**

The 5051 Metal Body Interior Luminaire Semi-Recessed (Slave/Mains) is illuminated by an 8 watt fluorescent lamp, powered via a Central Battery System. In the event of a mains failure, emergency illumination is provided for 3 hours. The AC/DC Slaves are available as 24 volt, 50 volt, 110 volt and 230 volt versions, with the latter suitable to work direct from the mains. Note, the mains version can not provide emergency illumination backup in the event of a mains failure. A self-contained version of the luminaire is also available (*Ref 5050*).

A strong Opal formed Diffuser comes as standard. Optional Brass and Chrome base finishes provide luminaires suitable for any high décor areas. A compatible Legends Kit (*Ref 5298/1*) can be supplied to help create inexpensive fire safety signs by fitting a legend panel to the front face of the diffuser.

There is a wide range of ancillary devices and related products which supplements this emergency lighting luminaire range.

**APPROVALS** : Designed to conform to ICEL 1001: 1999 and BS EN 60598-2-22 1999
